

Industrial Pneumatic Manipulator for Polypropylene Boxes

Maximum flexibility and safety even when handling unbalanced loads.

ATIS
MANIPOLATORI PNEUMATICI

Our pneumatic manipulator is specifically designed to efficiently and safely handle 1 or 2 polypropylene boxes simultaneously. Thanks to its adaptive pneumatic gripper, it can precisely grasp and transport one or two boxes simultaneously, even with unbalanced loads.

Main features:

- **Adaptive pneumatic gripper:** Automatically adapts to the number of boxes to be handled, ensuring a secure and stable grip even with uneven loads.
- **Intuitive control system:** Easy to operate and use, even by unskilled operators.
- **Robust and durable construction:** Designed to operate in harsh industrial environments.
- **High speed and accuracy:** Ensures fast work cycles and accurate, gentle box positioning.
- **Safety:** Equipped with safety devices to protect the operator and the product.

Why choose our manipulator:

- **Quality:** Manufactured from high-quality materials and built to the highest safety standards.
- **Reliability:** Guarantees continuous and long-lasting operation.
- **Customisation:** Possibility of customising the manipulator to your specific needs.

Advantages:

- **Increases productivity:** Reduces cycle times and optimises workflows.
- **Improves safety:** Eliminates the risk of manual lifting injuries.
- **Reduces costs:** Rapid amortisation of investment due to increased efficiency.
- **Increases flexibility:** Adapts to different box types and work configurations.
- **Reduces costs:** Rapid amortisation of investment due to increased efficiency and reduced labour costs.

Optimise your production processes with our pneumatic manipulator!
